Finished.

ABOUT ME

Graduated from the faculty of ART philosophy department, I didn't find myself in this field when I was in college, last year in college, I learned Python just for fun and I found myself. found my passion in programming, when you love something you're gonna be great at it, I love coding and I do love learning, so I decided to dive more into this field, took a lot of courses, and decided to be a Front-End web developer.

WORK EXPERIENCE

— ENS (PART TIME)

MAR 2024-NOW

Front-End Developer

I built a large-scale e-commerce project featuring both a dashboard and a web app for managing operations. As a Frontend Developer, I contributed to building and optimizing user interfaces using Next.js, React, Tailwind CSS, and MUI. I also integrated Socket.io to provide dynamic updates, ensuring a seamless and high-performance user experience.

PROJECTS

— LIFE POST

FullStack web

A web that you can sign in and see, share your posts with the world. A sleek and fully responsive web application built with Next.js 15, leveraging Tailwind CSS for styling and ShadCN for UI components. It features a dynamic content management system powered by Sanity

— XFUTURE

FullStack web

Practice for E-commerce website that provides product you can buy and pay is a modern e-commerce platform built with Next.js, leveraging Sanity as a headless CMS, ShadCN for elegant UI components, and Tailwind CSS for a responsive design. The platform integrates Stripe for secure and seamless payment processing,

— ZENTY CLONE

Front-end web

the project's purpose is standout animations you implemented! is a dynamic and visually engaging web experience built with React and powered by GSAP animations.
